UX / Correctness Re-Audit Report

Verification audit after bug fixes. Original: 25 findings. Remaining: 25 findings.

Severity	Count
CRITICAL	3
HIGH	9
MEDIUM	7
LOW	6
Total	25

UX-01	CRITICAL	PersonaSelector system prompt change has NO effect on sent messages
-------	----------	---

Files: ChatPanel.tsx, PersonaSelector.tsx, useChatStore.ts

Problem: PersonaSelector calls setSystemPrompt on the store, but ChatPanel uses its own local useState for systemPrompt. Store value never consumed by sendMessage.

Fix: Replace local useState with store value. Or merge local + store values.

UX-02	CRITICAL	EventsPanel references undefined constants - runtime crash
-------	----------	--

Files: EventsPanel.tsx

Problem: SEVERITY_CONFIG and TYPE_COLORS used but never defined or imported. ReferenceError at runtime when any event rendered.

Fix: Define the missing constants at module level.

UX-03	CRITICAL	EventsPanel SystemEvent type mismatch
-------	----------	---------------------------------------

Files: EventsPanel.tsx

Problem: Interface defines name/message/details but addEvent creates type/source/payload/severity. Rendering accesses non-existent interface fields.

Fix: Update interface to match actual usage.

UX-04	HIGH	PersonaSelector dropdown doesn't close on outside click or Escape
-------	------	---

Files: PersonaSelector.tsx

Problem: Dropdown opens on click but has no handler for clicking outside or Escape key.

Fix: Add useEffect with mousedown/keydown handlers when open.

UX-05	HIGH	FactCheckBadge expanded popup doesn't close on outside click or Escape
-------	------	--

Files: FactCheckBadge.tsx

Problem: Expanded popup has no click-outside or Escape handler.

Fix: Add useEffect with click-outside and Escape handlers.

UX-06	HIGH	CodeRunner shows Run for Python but never executes
-------	------	--

Files: CodeRunner.tsx

Problem: Python in EXECUTABLE_LANGS but sandbox HTML posts sandbox-result immediately without running code. User sees (no output).

Fix: Remove py/python from EXECUTABLE_LANGS or show clear 'not supported' message.

UX-07	HIGH	ConnectorsPanel Connect button fakes successful connection
-------	------	--

Files: ConnectorsPanel.tsx

Problem: handleConnect sets status=connected without any real auth. Notification says 'Securely connected to Slack API!' - completely misleading.

Fix: Change to 'Simulate Connection' or implement real flow.

UX-08	HIGH	CollabDebatePanel handleLeave clears ALL participants
-------	------	---

Files: CollabDebatePanel.tsx

Problem: setParticipants([]) on leave hides all other human participants. UI shows '0 participants' even if others still in debate.

Fix: Re-fetch participants after leaving instead of clearing array.

UX-09	HIGH	DebateVerdictPanel entirely hardcoded Russian - no i18n
-------	------	---

Files: DebateVerdictPanel.tsx

Problem: All user-facing strings hardcoded Russian. No useTranslation().

Fix: Add i18n. Replace all Russian strings with t() calls.

UX-10	HIGH	DebateBranchPanel entirely hardcoded Russian
-------	------	--

Files: DebateBranchPanel.tsx

Problem: Strings hardcoded Russian without i18n.

Fix: Add useTranslation() and t() calls.

UX-11	HIGH	DebateMemoryPanel hardcoded Russian despite importing useTranslation
-------	------	--

Files: DebateMemoryPanel.tsx

Problem: Imports useTranslation but doesn't use it. All labels in Russian.

Fix: Replace all Russian strings with t() calls.

UX-12	HIGH	PoolStatusPanel quota edit popup mispositioned
-------	------	--

Files: PoolStatusPanel.tsx

Problem: position:absolute with marginTop:4rem but parent lacks position:relative. Popup positioned relative to wrong ancestor.

Fix: Add position:relative to parent row. Or use portal/fixed positioning.

UX-13	MEDIUM	AutoDebateSection all labels hardcoded English - no i18n
-------	--------	--

Files: AutoDebateSection.tsx

Problem: All strings hardcoded English. No useTranslation used.

Fix: Add i18n support.

UX-14	MEDIUM	TournamentPanel all labels hardcoded English
-------	--------	--

Files: TournamentPanel.tsx

Problem: All strings hardcoded English.

Fix: Add i18n support.

UX-15	MEDIUM	CollabDebatePanel all labels hardcoded English
-------	--------	--

Files: CollabDebatePanel.tsx

Problem: All strings hardcoded English.

Fix: Add i18n support.

UX-16	MEDIUM	DebateWorkspacePanel mixed i18n - some strings hardcoded
-------	--------	--

Files: DebateWorkspacePanel.tsx

Problem: Uses useTranslation for some strings but many hardcoded: Debate Rooms, Create Room, etc.

Fix: Replace all hardcoded strings with t() calls.

UX-17	MEDIUM	ChatPanel cancelSending only cancels LAST request
-------	--------	---

Files: useChatStore.ts

Problem: In parallel mode, multiple requests in-flight. cancelSending only cancels last entry's requestId. Others continue but isSending=false.

Fix: Iterate over all loading/streaming entries and cancel each.

UX-18	MEDIUM	LogsPanel auto-scroll forces scrollTop=0 on every scroll event
-------	--------	--

Files: LogsPanel.tsx

Problem: onScroll handler sets scrollTop=0 when autoScroll is on. Makes scrolling impossible when auto-scroll enabled.

Fix: Only auto-scroll when new entries arrive, not on every scroll event.

UX-
19

MEDIUM

DebateReplayPanel Pause/Resume/Cancel buttons have no feedback

Files: DebateReplayPanel.tsx

Problem: Buttons call engine methods in empty try/catch. No visual feedback (loading, success, error) when actions succeed or fail.

Fix: Add success/error notifications and disable invalid buttons.

UX-
20

LOW

VoiceButton doesn't handle onTranscript prop change

Files: VoiceButton.tsx

Problem: Stale closure: if onTranscript changes while recognition active, old callback used.

Fix: Use ref for latest onTranscript.

UX-
21

LOW

MarkdownRenderer doesn't wrap list items in ul/ol

Files: MarkdownRenderer.tsx

Problem: Each li rendered standalone without parent ul/ol. Invalid HTML. Nested lists not supported.

Fix: Group consecutive list items into containers.

UX-
22

LOW

HistoricalFiguresPicker missing Escape key handler

Files: HistoricalFiguresPicker.tsx

Problem: Modal handles outside clicks but not Escape key.

Fix: Add useEffect for Escape key.

UX-
23

LOW

MemoryContextPanel search errors show No results

Files: MemoryContextPanel.tsx

Problem: When search() throws, setResults([]) silently. User can't tell if no matches or search failed.

Fix: Add error state with 'Search failed' message.

UX-
24

LOW

ChatPanel Configure Providers button uses unreliable EventBus navigation

Files: ChatPanel.tsx

Problem: EventBus.emit(NAVIGATE) relies on global listener. If listener not set up, button does nothing.

Fix: Use React Router useNavigate.

UX-
25

LOW

ChatPanel handleSend input clearing happens after await

Files: ChatPanel.tsx

Problem: setInput("") called after await sendMessage. User could type more text during await that gets cleared.

Fix: Clear input immediately before await.
